2024 Spring Satellite Sun Outage Forecast | March 2-9

With the coming of spring, it is time to prepare for the upcoming spring satellite sun-outage schedule that may disrupt your programming. This occurrence happens in the spring and fall when the satellite transits the sun's disk for a few minutes each day over a period of several days in many parts of the United States.

The Moody Radio satellite channels (Moody-1 and Moody-2) on SES-2 (87-degrees West Longitude) Transponder 23C will experience the first outages of the season around March 2-9, 2024.
